Svjetlana Terzić

SHORT CV

Svjetlana Terzić works in the areas of algebraic topology and differential geometry, in particular the geometry and topology of homogeneous spaces. She graduated from the University of Montenegro and obtained a master's degree from the University of Belgrade, supervised by Novica Blažić. She holds a PhD from MSU M. V. Lomonosov, followed by a postdoctoral position at LMU Munich. She is a full professor at the University of Montenegro and a full member of the Montenegrin Academy of Sciences and Arts.
